

***N(1990) 7/2<sup>+</sup>*** $I(J^P) = \frac{1}{2}(\frac{7}{2}^+)$  Status: \*\*

## OMITTED FROM SUMMARY TABLE

Most of the results published before 1975 are now obsolete and have been omitted. They may be found in our 1982 edition, Physics Letters **111B** 1 (1982). Some further obsolete results published before 1984 were last included in our 2006 edition, Journal of Physics **G33** 1 (2006).

The various analyses do not agree very well with one another.

The latest GWU analysis (ARNDT 06) finds no evidence for this resonance.

## ***N(1990) FOOTNOTES***

<sup>1</sup> The range given for DEANS 75 is from the four best solutions.

<sup>2</sup> This ANISOVICH 12A value is the complex helicity amplitude at the pole position.
